A & E Specifications

Description:

The loudspeaker system that works on the principle of a bending-wave transducer. It has a flat-panel membrane, which is set into vibration by an exciter that is mounted on the rear.

The Novasonar kreativ as decorative element can be manufactured in any geometrical shape and designed with any of the following surfaces:

Genuine wood veneers or laminates, can be smoothed over, varnished, covered with a thin layer of plaster or wallpaper or have a self-adhesive design for laminations.

The frame has a particularly robust design to reduce the transfer of the membrane vibrations to the surrounding structure. A 100-V transformer and a passive crossover network is also available as an option.
